

DSM Weldmesh.

Weldmesh fencing panel system suitable for a universal range of applications and uses.

Welded mesh fencing has a wide range of uses, from temporary fencing to sports to boundary demarcation up to high security for the securest applications. All with a pleasing aesthetic finish.

Flat panels with double horizontal wires for strength.

Available heights:

2.00m, 2.40m & 3.00m common standards or 600mm to 2.40m in 200mm increments (height availability depending upon mesh design). By combining different panels heights up to 8.00m is possible as a norm. Heights above 8.00m on request.

Standard Wire:

Ø6mm/5mm/6mm (SL)

Ø8mm/6mm/8mm (RG).

Standard mesh: 200x50(55)mm special sizes 66x50mm (R), 200x25 or 200x35mm variable size mesh RG only.

**Options* Specially finished weldmesh panels with decorative edges, concave/convex or wave effect tops. Sports fencing (R) incorporating a smaller mesh up to 1.20m high with rebound capability for MUGA areas is also included in the range.

Standard post size 60x60mm square hollow section for fencing up to 2.40m high however a complete range of posts is available, circular, square or rectangular hollow section height and section dependant upon application.

Standard clips (DK) that secure panels to the post face are used for most applications with a full height clamp bar (D) option for higher security and sports applications. A further choice of fittings from wrap around post clamps, mounting block with W-clamp, through post hook-bolts or a full height toothed clamp strip can be offered depending upon application and budget.

Finish

- Galvanised (or Galfan for particular products) as standard:
- Option; additionally powder coated:
 - Standard RAL 6005 colour green:
 - Standard RAL 9005 colour black:
 - Any RAL colour:
